World Report on Disability-World Health Organization 2011 The World Report on Disability suggests more than a billion people totally experience disability. They generally have poorer health, lower education and fewer economic opportunities and higher rates of poverty than people without disabilities. This report provides the best available evidence about what works to overcome barriers to better care and services.

regarding a variety of information issues have emanated from federal agencies, legislative chambers, and corporate boardrooms. Despite the focus on information policy, it is still a relatively new concept and one only now beginning to be studied. The subject area is wider than believed—archives and records policies, information resources management, information technology, telecommunications, international communications, privacy and confidentiality, computer regulation and crime, intellectual property, and information systems and dissemination. This is not a compendium of policies to be used, but rather an exploration in a more detailed fashion of the fundamental principles supporting the setting of records policies. Records policies are critically important for records professionals to develop and use as a means of strategically managing the information and evidence found in the millions of records created daily, provided that the policies are based on comprehensible principles. This is a series of discourses on the fundamentals of archives and records management needing to be understood before any organization attempts to define and set any policy affecting records and information. The chapters concern defining records, how information technology plays into policy compiling, the fundamental tasks of identifying and maintaining records as critical to records and information policy, public outreach and advocacy as a key objective for such policy, and the role of educating records professionals in supporting sensible records policies.

What are Archives? Louise Craven 2016-02-11 This collection of essays breaks new ground in archival studies in the UK where professional archival texts have traditionally concentrated on the how, not the why, of archival work. Studies of the theoretical role of, for example, the archive and the text or the archive and political power, have meanwhile been undertaken in other academic disciplines where there is an established forum for the discussion of related issues. This book invites the archivist to join that arena of debate, whilst appealing to all those interested in archives from other disciplines; the authors encourage archivists to step away from the practicalities of keeping archives to consider what it is they actually do in the cultural context of the early 21st century. The wider context of technological innovation and the internet form the backdrop to this collection. The book explores change and continuity in the archival paradigm, the textual nature of archives and asks if views of manuscripts and personal papers are changing; it looks at specific developments in community archives, at concepts of identity and culture in archives and it presents the fruits of innovative studies of users of archives. Taken together, these essays, written by leading experts in the field, provide a new understanding of the role of the archive today.

Informing Transitions In The Early Years Dunlop, Aline-Wendy 2006-12-01 This book aims to bring attention to children’s experiences of personal and curricular transitions in early childhood from entry to group-settings outside home to joining playgroup or nursery school and on into the early years of formal education.
